PROFILE

I am currently working for DevMountain as a mentor for their immersive web development class. As class ends in November, I am seeking a junior level MEAN stack developer position with a company that inspires and challenges me.

EXPERIENCE

MENTOR

DEV MOUNTAIN | AUG 2016 - NOV 2016

- Guided a cohort of 20 students in conceptual understanding of front end and back end web development during assignments and lectures.
- Mentored six students, held weekly one on ones to discuss progress in program and develop on strengths and weaknesses.
- Gave mini-lectures over Git, Sass and Ionic.

GUIDANCE SPECIALIST

UNITED CAPITAL | MAY 2015 - MAY 2016

- Worked along side financial advisers to put together comprehensive financial plans for clients.
- Co-Managed the build out of our adviser side client handbook rendering process utilizing back end developers from overseas.

EDUCATION

CODING BOOTCAMP: WEB IMMERSIVE

DEV MOUNTAIN, DALLAS | 2016 - 2016

BACHELOR OF SCIENCE, MAJOR IN GLOBAL BUSINESS & FINANCE

VIENNA UNIVERSITY OF ECONOMICS AND BUSINESS
UNIVERSITY OF TEXAS AT DALLAS | 2010 - 2015
GPA: 3.6

PROJECTS

SPOT ASSIGN
BACK END DEVELOPMENT

Spot Assign was a project I worked with four other students during my time at DevMountain. We were given three weeks to build out a fully functional web application that would be able to take booth reservations for large events. I built out the backend with Node.JS and did some of the functionality in the front end. To learn more, and see the app in action, check out a preview on my website.

DOGGIE DAYCARE
ANGULAR & FIREBASE

Doggie Daycare was a web application that I built in three days using Angular and Firebase. I created a website with the ability to create a dog profile and schedule appointments. The admin side of the app could approve or deny appointments.
